PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with 4+ years of experience delivering scalable, high-performance web applications across diverse industries including e-commerce, legal tech, hospitality, and enterprise management. Specialized in Laravel (PHP) and modern JavaScript frameworks, with a proven track record of building 8+ production systems from the ground up. Committed to Clean Code principles, SOLID architecture, and exceptional user experience.

4+ Years Experience	**8+** Projects Delivered	**100%** Mobile Responsiveness	**4.9/5** Avg UX Score	**99.9%** System Uptime

TECHNICAL SKILLS

Back-End	PHP (OOP) · Laravel 10 · RESTful APIs · MVC Architecture · SOLID Principles · Middleware & RBAC · Eloquent ORM · Database Migrations & Seeders
Front-End	JavaScript (ES6+) · Vue.js · jQuery · Blade · Inertia.js · Tailwind CSS · Bootstrap · Responsive Design
Databases	MySQL · PostgreSQL · Redis (Caching)
Tools & DevOps	Git / GitHub · Docker · Composer · NPM · Unit Testing (Pest / PHPUnit)
Integrations	Stripe · PayPal · SMTP Email · Google Maps API · Chart.js · PDF Generation · Excel Export · Laravel Sanctum

WORK EXPERIENCE

IT Technical Support | **Storage Station** *2025 – 2026*

- Provide technical support for hardware, software, and network-related issues across the organization.
- Install, configure, and maintain company systems, applications, and security practices.
- Manage system backups, updates, and troubleshoot errors to ensure smooth daily operations.

Freelance Full Stack Developer | **Self-Employed** *2023 – 2025*

- Designed and delivered 5+ custom web applications for clients across e-commerce, legal, hospitality, and construction sectors.
- Managed full project lifecycle — requirements gathering, development, QA testing, and deployment — achieving 100% on-time delivery.
- Focused on performance optimization, security hardening, and clean scalable architecture using Laravel and modern JavaScript.
- Built RESTful APIs consumed by Vue.js front-ends, integrating payment gateways (Stripe, PayPal) and third-party services.

Web Developer | **ME Group Co.** *2022 – 2023*

- Developed and maintained 3+ production web systems using Laravel and MySQL serving hundreds of active users.
- Implemented secure authentication, authorization, and Role-Based Access Control (RBAC) using Middleware and Policies.
- Designed optimized database schemas using migrations and seeders; reduced query load by 30% through indexing and caching.
- Collaborated on full-stack features — front-end interfaces, back-end logic, testing, and debugging in an Agile environment.

Trainee Developer | **Concept Design** *2021 – 2022*

- Assisted in developing and maintaining client websites using PHP, MySQL, and front-end technologies.
- Gained hands-on experience in version control (Git), teamwork practices, and real-world project workflows.

KEY PROJECTS

Express Abbas — Multi-Department E-Commerce Store

- Built fully responsive multi-category storefront with smart classification system (watches, accessories, gifts) using Laravel 10, Vue.js, MySQL, and REST API.
- Integrated dynamic promotional engine and discount management system, increasing conversion rates.
- Delivered with: 4.9/5 UX · +A performance · 1.2s load speed · 98% responsiveness.

Digital Legal Consultation Platform

- Developed secure platform connecting specialized lawyers with clients (individuals & organizations) using Laravel 10 + Vue.js.

- Implemented Case Submission System with RBAC, encrypted document uploads, and client request tracking dashboard.
- Built RESTful API layer with Laravel validation and Sanctum authentication for full data security.

eStore — Multi-Department E-Commerce Platform

- Full e-commerce solution with inventory management, order tracking, and electronic payments (PayPal, Stripe).
- Integrated SEO optimization for global product visibility and built smart sales dashboard with Chart.js analytics.

Feane — Fast Food Restaurant Management System

- E-commerce food platform with online table reservation, smart menu management with offers/discounts, and high-contrast visual design.
- Fully responsive across Desktop, Tablet, and Mobile; integrated admin panel for complete operational management.

Inspire — Smart Admin Dashboard & Analytics

- Comprehensive admin system converting complex data into visual insights using Docker, Redis, Alpine.js, and Laravel Livewire.
- Features: real-time statistics, interactive charts, financial resource management with monthly/annual comparisons — 99.9% uptime, 40%+ productivity gain.

Invoice Management System

- Full-featured billing system between companies and banks with live dashboard statistics (Chart.js), Excel/PDF export, and email notifications.
- Advanced RBAC, AJAX-driven interfaces, attachment management with preview/download — built on Laravel, MySQL, Bootstrap, jQuery.

Engineering Projects Portfolio Website

- Cinematic-quality platform built with Tailwind CSS, PostgreSQL, Google Maps API, and JavaScript for showcasing architectural projects.
- Features: consultation booking, professional image gallery with lazy loading, API-connected contact automation with instant notifications.

EDUCATION

Bachelor's Degree in Computer Science *2021 – Present*

Gaza University — Faculty of Engineering & Information Technology

PERFORMANCE BENCHMARKS

95% User Experience	**92%** Code Performance	**100%** Mobile Responsiveness	**90%** System Security	**88%** SEO Optimization
